The Pasco Education Foundation, Inc. was established in February of 1991 to increase involvement in Pasco County's public schools, to channel funds from the private sector into programs enhancing public education, to encourage imaginative and creative approaches to teaching, and to recognize and reward excellence in education. The Foundation is a direct support, nonprofit, 501(c) 3 organization providing support for programs where tax dollars cannot be used and where budgets fall short.

A message to our students, their families, our educators, and our business and community partners:

First and foremost, please be safe during these uncertain times and follow all recommended precautions as stated by our local government and officials. The staff and Board of Directors of the Pasco Education Foundation and Take Stock in Children Pasco are still working on your side with the continual goal of providing support for our programs to advance student achievement. While we are working remotely, you can visit our website to connect with us via email or message us on our website or any of our social media platforms.

The Pasco Education Foundation is following the advice and guidance of our partners at Pasco County Schools, as well as agencies such as the Department of Education, the Center for Disease Control, and the Department of Health. We have canceled, postponed, or modified many of our programs, events, and initiatives in accordance with this input. Due to the current fluid and changing circumstances, we will continue to keep you all apprised of any changes we make moving forward. Please check your emails, visit our Facebook page, and Twitter for current updates.

Please remember that you are important to us! Please stay safe and take care of your family and friends. We will get through this as a community and come out of this stronger.

Sincerely,

Stacey Capogrosso

President & CEO

Eric Johnson

Board Chairman
